

MAEA OUTPLACEMENT SERVICES

Reducing the size of a company's workforce is often an option of last resort for most managers, as it is not an easy process for the company or the employee. Since April 2009, MAEA has been offering Outplacement and Transition Services to member companies' displaced workers in order to make a smooth transition into new employment. The purpose of the Outplacement and Transition Services is twofold—to help employees move quickly and seamlessly into a new job; and to impact companies' unemployment rates as little as possible. The levels of outplacement and transition services vary based on the level of the displaced employee. The services are facilitated by Maureen Grant - HR Specialist for MAEA.

MAEA's member companies have been taking advantage of the new services, and we are happy to share a success story of an employee who participated in this service:

"I would like to thank all of you for your help. My resume skills were lacking to say the least, but with Maureen's help it improved immensely. You made me feel at home here, and answered any questions I had. The time spent here has made it easier for me during my job search.

Thanks again to Maureen and Debby for all your help. I really enjoyed meeting you and all the people here.

*Thank you!
Bob Belas"*
